Ever since I could first remember, I've been fascinated by how things work. While it took me some time to discover my zeal for development, I haven't stopped pursuing it ever since.

I acquainted myself with research, design, business, and management to better understand the implications, communicate well with all parties involved. This also led me to become a better developer in the process.

If I had to describe myself in one word, that'd be **STALWART**.

Experience

September 2021 - Present

Frontend Developer Associate Manager

Accenture Song, Helsinki, Finland
